DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a method for producing a nonwoven cloth, classified in class 28, subclass 100.
 - II. Claims 17-27, drawn to an abrasive nonwoven cloth, classified in class 442, subclass 327.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the nonwoven can be made by heat-treating the fabric before providing a pattern of raised and lowered regions.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mark Friedman on November 30, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1771

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
